

## Field Treatment

1. Basic airway/spinal immobilization prn
2. Oxygen
3. Advanced airway prn
4. If shock, treat by NONTRAUMATIC HYPOTENSION **M8** or appropriate TRAUMA guideline.
5. Cardiac monitor/document rhythm and attach EKG strip
6. Blood glucose test
7. Venous access prn
8. If hypoglycemia, **dextrose 50% 50ml IVP.**  
**① ②**

☞ May repeat one time.

**Note:** ①  
② Fast-Mag Trial Study

## Drug Considerations

Dextrose:

- ① Pediatrics: see Color Code Drug Doses/L.A. County Kids
- ② Caution in administering to alert patients with acute focal neuro deficits.

## Special Considerations

- ① If unable to establish venous access and known diabetic, consider **glucagon 1mg IM**.  
 Same for pediatrics.
- ② If patient meets inclusion criteria for the Fast-Mag Trial Study, direct the paramedics to contact the Fast-Mag physician on-call for patient enrollment and administration of the Fast-Mag Trial Study agent.
